What's happening in the DRC (Congo)?

Since 1996, over 6 million people have died in the DRC due to Western capitalist interests, since Congo is extremely rich in natural minerals (e.g. Coltan and Cobalt) and other valuable natural resources. This coincides with the Rwandan-backed M23 offensive in Kivu, Eastern Congo and a humanitarian crisis (famines, rising S.A levels, displacement, child/slave labour in mines). #silentholocaust #whatishappeningincongo
